## MOST VERTICAL IN NORTH AMERICA

**TOP ELEVATION** 2,225M (7,300FT)  
**BOTTOM ELEVATION** 512M (1,680FT)  
**VERTICAL** 1,713M (5,620FT)  
**TERRAIN** 1,263 HECTARES (3,121 ACRES)  
**LONGEST RUN** THE LAST SPIKE - 15.2KM (9.5 MILES)  
**EASIEST WAY DOWN** THE LAST SPIKE  
**RUNS & AREAS** 65

**STAY IN BOUNDS! DON'T PUT OUR RESCUERS AT RISK**

**ALPINE RESPONSIBILITY CODE**  
 Know the Code - Be Safety Conscious. It is Your Responsibility.  
 There are elements of risk that common sense and personal awareness can help reduce. Regardless of how you decide to use the slopes, always show courtesy to others. Please adhere to this code and share with others the responsibility for a safe outdoor experience.

<b>1</b> Always stay in control. You must be able to stop or avoid other people or objects.	<b>6</b> Always use proper devices to help prevent runaway equipment.
<b>2</b> People ahead of you have the right-of-way. It is your responsibility to avoid them.	<b>7</b> Observe and obey all posted signs and warnings.
<b>3</b> Do not stop where you obstruct a trail or are not visible from above.	<b>8</b> Keep off closed trails and closed areas.
<b>4</b> Before starting downhill or merging onto a trail, look uphill and yield to others.	<b>9</b> You must not use lifts or terrain if your ability is impaired by alcohol or drugs.
<b>5</b> If you are involved in or witness a collision or accident, you must remain at the scene and identify yourself to Ski Patrol.	<b>10</b> You must have sufficient physical dexterity, ability and knowledge to safely load, ride and unload lifts. If in doubt, ask the lift attendant.

**AUTOMATIC \$1000 MINIMUM COST FOR GUESTS ASSISTED BY RMR STAFF OUTSIDE THE BOUNDARY AND IN CLOSED AREAS.**

TERRAIN OUTSIDE OF THE AREA BOUNDARY BELOW THESE ICONS CONTAINS REDUCED SNOW DEPTH, EXTREMELY TIGHT TREES, AND BIG CLIFFS. DO NOT SKI/ RIDE BELOW THE ELEVATION OF THE ICONS OR YOU WILL REQUIRE RESCUE.

**HOW TO DECIDE WHERE TO SKI & RIDE!**

### Conical Mountain

Because of Mt. Mackenzie's conical shape and large boundary area, it's easy for skiers to quickly disperse from the top, but it's also easy to get separated by skiing just one run over. Check the map and agree on a meeting spot before dropping into your line.

### 6 Terrain Zones

Frontside, Southside, Sub Peak, North Bowl, Greely Bowl, and the Ripper area. Traverses off the Stoke Chair provide quick access to North Bowl, Greely Bowl, Southside, and the Ripper Chair. Intermediate skiers/

riders looking to access the Ripper can also take the Ripper Connector via Critical Path. Sub Peak can be reached from the boot pack trail behind the Patrol Hut at the top of the Stoke Chair. The most direct access to North Bowl is through Meet The Neighbours, Sweet Spot, and Drop In.

### Strategic Lift Placement

The split between the upper and lower Revelation Gondola gives guests the option of skiing from the mid-station for shorter and easier laps. From the top of the Gondola, guests can either ski to the Village, or

continue up the Stoke Chair. The Ripper Chair can be accessed from the Stoke via North Bowl, Greely Bowl, Sub-Peak, or the Ripper Connector. Our two beginner areas are serviced by the Turtle Creek Magic Carpet in the Village and the Little Bit Magic Carpet at the Revelation Gondola mid-station.

### Unique Weather Effects

With the Most Vertical in North America, skiers on Mt. Mackenzie experience unusual weather phenomena resulting in three different weather zones: 1) Village to Daylodge, 2) Gondola Mid-Station to Stoke base, 3)

Gondola top to summit. In storm cycles, the prevailing SW wind deposits snow on the South aspects and causes heavy wind-loading in North Bowl, depositing deeper drifts of fresh powder which may not be detected by our snow plot. Benefiting from our geographical locale, Revelstoke's abundant snowfall can be attributed to both the SW storm cycles which refresh the mountain on a regular basis, and the hard-hitting N-NW snow dumps. Automated snow reporting, webcams, and detailed weather reports from our expert forecasters are the tools we provide to help you prepare for your day on the mountain.

### Extensive Tree Skiing

Beyond the incredible fall-line runs, wide open bowls, and flowing groomers are the 16 named and gladed areas that often lie either side of you on the trail. Wider trees like Aspen Glades and Tasty Glades allow for comfortable skill progression, while tighter and steeper trees like Clyde's Secret Glades and Powder Monkey Glades offer deep powder and natural features to challenge your skills.
